PROFESSIONAL SUMMARY

Full Stack Developer skilled in the **MERN stack (MongoDB, Express.js, React.js, Node.js)**, **Next.js** and **TypeScript**, building production-ready web applications end to end, including a live inventory and billing system used daily by a client business. Experienced in REST APIs, JWT/OAuth authentication, role-based access control, MongoDB, PostgreSQL, Razorpay payments, automated testing and Vercel deployment.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frontend: React.js, Next.js (App Router, Server Components, Server Actions), Tailwind CSS, shadcn/ui, React Hook Form, Framer Motion, Responsive Web Design

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, NextAuth, OAuth 2.0 (Google, GitHub), bcrypt, Argon2, Zod Validation, Role-Based Access Control (RBAC)

Databases: MongoDB, Mongoose, PostgreSQL, Prisma ORM, Supabase

Testing & DevOps: Vitest, Integration Testing, Git, GitHub, Vercel, Cloudinary, Razorpay, Google Sheets API, VS Code

AI & Automation: Prompt Engineering, GLM-5.2 (Z.ai) API, Multi-Step AI Orchestration, n8n Workflow Automation, Social Media Automation

EXPERIENCE

Full Stack Developer Intern Feb 2026 -- Aug 2026

Omokai

- Built an AI blog-generation system using the **GLM-5.2 (Z.ai) API**, orchestrating multiple generation steps across the writing workflow to produce article content automatically.
- Wrote and iteratively tuned the prompts driving the pipeline, refining instructions and examples to improve the consistency and quality of generated articles.
- Developed content automation for **Reddit and X (Twitter)**, handling scheduled publishing of posts across both platforms.

Full Stack Developer (Freelance) Aug 2025 -- Present

Self-Employed

- Built and deployed full-stack web applications for business clients, including a **live inventory and billing system** (see Projects).
- Automated **100% of contact-form data processing** using n8n, eliminating manual data entry and creating a centralised Google Sheets repository for easy access and analysis.
- Implemented a real-time notification system with **99.9% delivery reliability** through retry mechanisms, replacing manual processing of form submissions with instant automated replies.

PROJECTS

Salon Inventory & Billing System (Live Client Project) Live | GitHub Sep 2026 -- Present

Tech: Next.js 16, React 19, TypeScript, PostgreSQL, Prisma, Tailwind CSS, Zod, Vitest, Vercel, Supabase

- Sole developer of a full-stack inventory, billing and shop-management web app for a salon and wig shop; **in daily production use by the client since Sep 2026** on phone, tablet and PC.
- Designed **21 database models** and a stock ledger that records every quantity change; billing and stock updates run in one database transaction with **row locks to prevent overselling**.
- Implemented **role-based access control** (Owner, Manager) enforced on the server, secure authentication with Argon2id and HttpOnly JWT cookies, Zod input validation and an audit log.
- Built billing with open and pay-later bills, Cash/UPI/Card payments, thermal receipts, barcode scanning, purchase orders, attendance-based salary deduction, sales reports and Excel export.
- Wrote **160+ integration tests** against a real PostgreSQL database covering authentication, permissions, billing and concurrency.

ShopMate -- Full-Stack E-Commerce Platform Live | GitHub *Tech: Next.js 14, Node.js, MongoDB, Razorpay, Cloudinary*

- Built storefront and admin panel from scratch: JWT authentication with HTTP-only cookies, role-based access via Next.js middleware, cart with guest-to-user sync on login, Razorpay checkout, Cloudinary image uploads, and product and order management.

Employee Management System (MERN) *Tech: MongoDB, Express.js, React.js, Node.js*

- Full-stack MERN application with a separate REST API backend and React frontend for managing employee records.

Multi-Provider Authentication System *Tech: Next.js 16, NextAuth, MongoDB, Mongoose, bcrypt*

- Authentication app supporting Google OAuth, GitHub OAuth and email/password sign-in through NextAuth, with bcrypt password hashing, Mongoose user persistence, middleware-protected routes and a set-password flow for OAuth users.

D2E Construction -- Corporate Web Platform *Tech: Next.js, Framer Motion, Tailwind CSS*

- Responsive corporate website with parallax hero animation, interactive service panels and downloadable Excel takeoff summaries.

EDUCATION

B.Tech, Information Technology 2018 -- 2022

Shri Shankaracharya Technical Campus, Bhilai *CGPA: 7.3*
